

Fund Outline

The Fund aims to maximise risk-adjusted total returns to investors by identifying and investing in a number of investment funds (underlying funds) with a focus on those assessed to have superior return potential. The Fund will be managed principally by adjusting the mix of underlying funds. Investing in underlying funds means the Fund can be exposed to a broad range of investments and asset classes. The goal is to manage the mix of underlying funds so as to obtain the combination of investment strategies that Bateau Asset Management believes will achieve the Fund's objectives. Initially the Fund will be up to 100% invested in the Ddraig Equity Fund, an underlying unlisted fund domiciled in the Cayman Islands, committed to delivering compelling risk adjusted investment returns with a focus on opportunities across global equities.

The Fund targets a return of 8-11% p.a. after fees and expenses over a period of 5 years.
